ABOUT ME

A highly motivated and quick learner, I am a backend-focused full-stack developer with a solid foundation in PHP, Laravel, React.js, Next.js, Node.js, and Python. Passionate about AI integration, I build intelligent web applications featuring AI chatbots, customer support bots, document parsing with auto-fill, and smart suggestion systems — using APIs from Anthropic (Claude), Google (Gemini), and OpenAI (ChatGPT). I leverage Node.js and Python as my primary runtimes for AI feature implementation.

EXPERIENCE

Mid-Level Full-Stack Developer (Backend Focused) | [Digital Graphiks](#)

December 2024 – Present

- Specialized in PHP and Laravel for backend, with React.js and Next.js for frontend applications.
- Built scalable, secure web applications with robust APIs, database management, and responsive UIs.
- Integrated AI features including Claude (Anthropic), Gemini, and ChatGPT APIs using Node.js and Python.
- Developed AI chatbots and customer support bots deployed across client web applications.
- Built document upload-to-autofill features where file data is parsed and mapped into form inputs via AI.
- Implemented AI-powered suggestion engines for improved UX and productivity.

Junior Developer | [Alisons Technology](#)

July 2024 – November 2024

- Built dynamic, scalable applications using HTML, CSS, JavaScript, PHP, and Laravel.
- Integrated seamless front-end and back-end solutions across multiple client projects.

Virtual Web Development Intern | [Remote / Unpaid Internship](#)

December 2023 – February 2024

- Gained hands-on experience building projects with the MERN stack.
- Implemented REST APIs for smooth data integration between client and server.
